## AFTER THE CLOTILDA: AFRICATOWN'S HIDDEN HISTORY

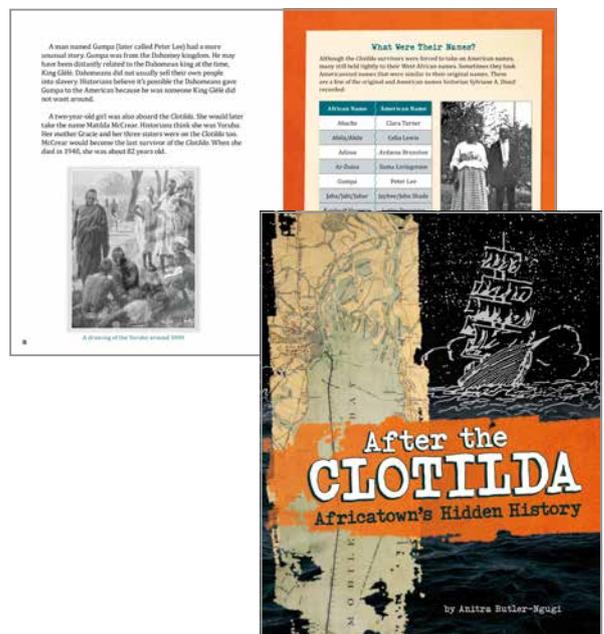

In 2019, the remains of the Clotilda were discovered in the Mobile River. The discovery of the last slave ship helped document the history of Africatown—a community built by Africans who had been illegally brought to Mobile, Alabama, on that ship in 1860 and enslaved. But for more than 160 years, the people of Africatown have been preserving their own history and culture—and fighting for a hard-won community that has been encroached upon for decades. In this book, students will learn about the survivors of the Clotilda, the community they built, and the people's resilience in the face of environmental racism.

## THE BRAVE CYCLIST

Once a skinny and weak child, Italian Gino Bartali rose to become a Tour de France champion and one of cycling's greatest stars. But all that seemed unimportant when his country came under the grip of a brutal dictator and entered World War II on the side of Nazi Germany. Bartali might have appeared a mere bystander to the harassment and hatred directed toward Italy's Jewish people, but secretly he accepted a role in a dangerous plan to help them. Putting his own life at risk, Bartali used his speed and endurance on a bike to deliver documents that Jewish people needed to help them escape harm. His inspiring story reveals how one person could make a difference against violence and prejudice during the time of the Holocaust.

Sofia nodded. "She's really good at basketball. I get it from her."

Blah, blah, blah, thought Levi. Sofia was always going on about basketball or about her mom, who was in the army and stationed overseas.

Levi started his kata again. Then Sofia started doing karate too—some combo drill of kicks and punches. Was she trying to outdo him?

"Nice, Sofia!" called Mom.

"I used to take karate," Sofia reminded her. But she looked at Levi when she said it.

I know, I know, he thought. Everybody knows. He also knew that Sofia had only earned her purple belt, a belt lower than him.

Paul, Sofia's dad, crossed the yard from the garage. "You could rejoin karate now that basketball camp is over," he suggested. "Maybe at Levi's dojo?"

Suddenly, Maya stood up in the water and poked Jenny in the ribs. "Race ya!" she shouted, taking off toward the opposite end of the pool.

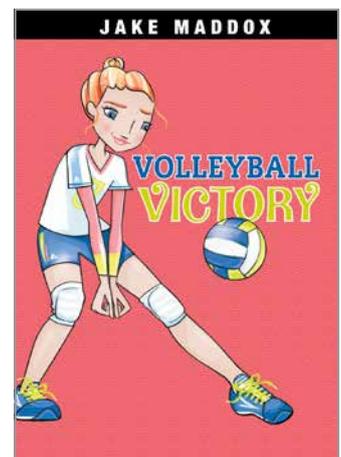

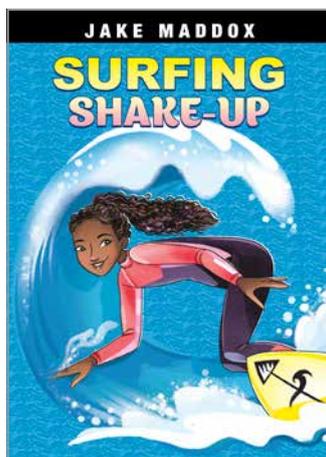

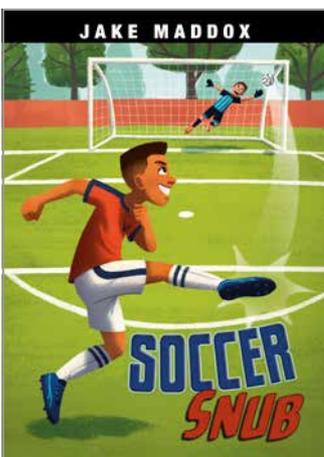

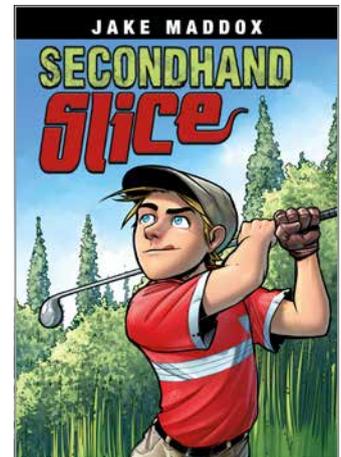

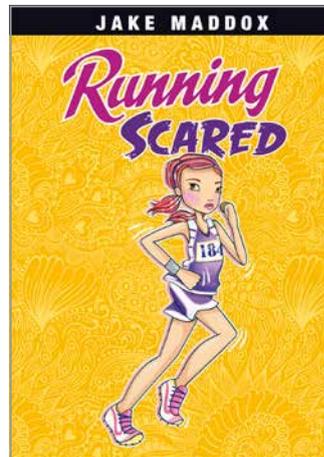

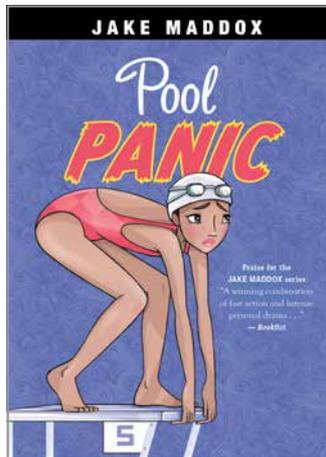

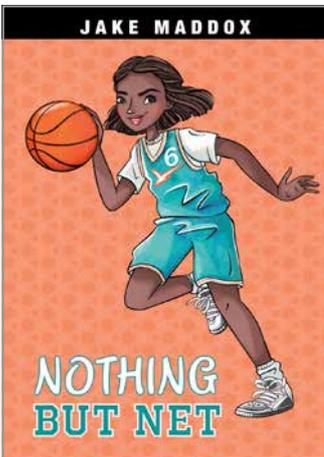

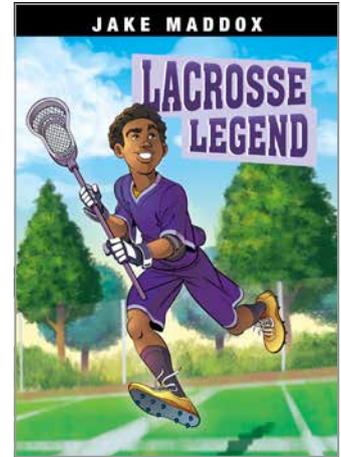

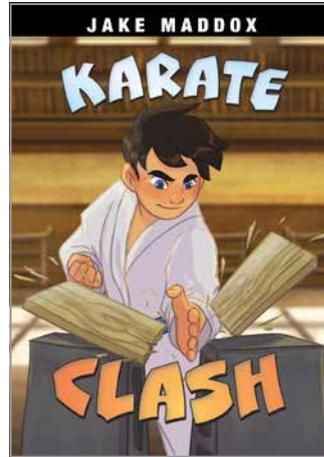

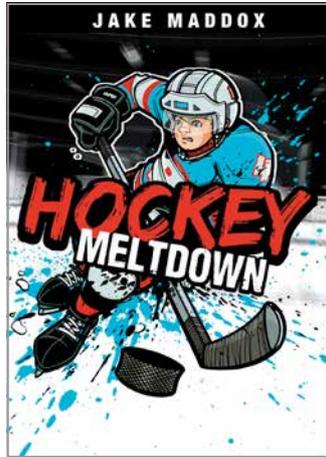

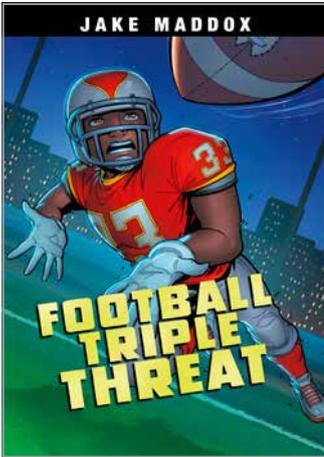

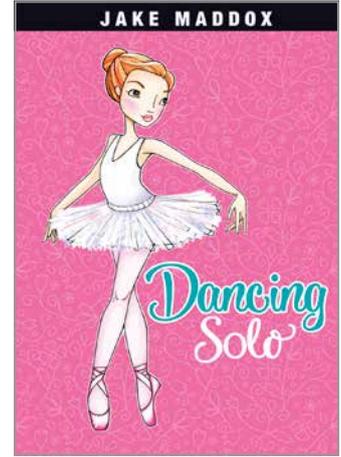

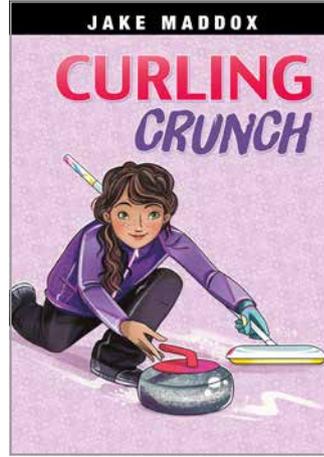

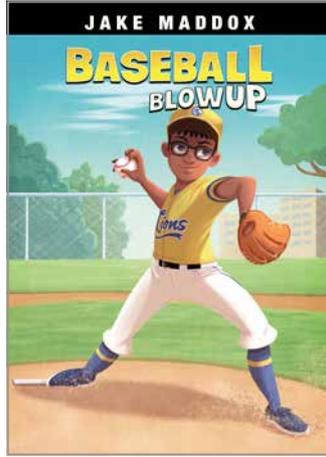

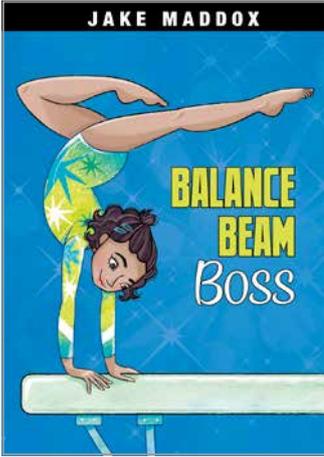

Jenny laughed and quickly flipped over. She cut through the water with powerful strokes. Soon she caught up to Maya and then easily passed her. Jenny grabbed the wall a couple of seconds before her friend.

Maya came up from the water, grinning. "Hal-See? You have to join the team with me," she said. "You're a great swimmer. It would be so much fun!"

Jenny rolled her eyes but smiled. "Okay, fine," she said. "I guess as long as we do it together, it'll be fun."

"Yay!" Maya shouted, giving her a big, wet hug. "Swim team, here we come!"

"What's the matter?" Adlynn came up behind her, sounding annoyed.

Talyah's struck hand suddenly came away from the rock. She stared at her glove. There was no sign of goo or rock on it. The rock face also had no evidence of her being stuck to it.

"My . . . my hand . . . it was stuck," she stammered. "It was a gooey substance, just like Erik said."

"I don't see anything." Adlynn grabbed Talyah's hand. She flipped it over. "You're probably disoriented. It happens sometimes with new miners. I'm guessing that's what's going on with

## THE FRIENDSHIP LIE

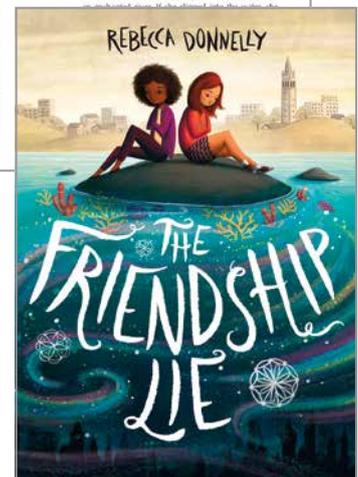

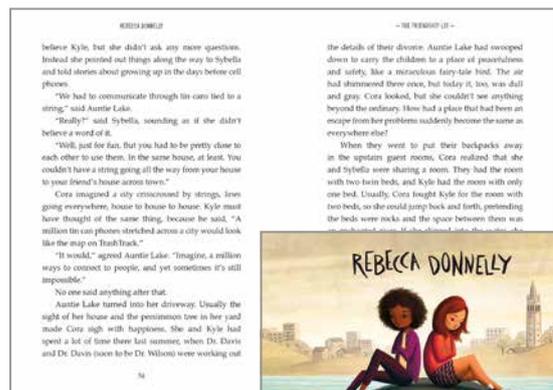

Cora Davis's life is garbage. Literally. Her professor parents study what happens to trash after it gets thrown away, and Cora knows exactly how it feels—to be thrown away. Between her mom and dad separating and a fallout with her best friend, fifth grade for Cora has been a year of feeling like being tossed into the dumpster. But Cora has learned a couple of things from her parents' trash-tracking studies: Things don't always go where they're supposed to, and sometimes the things you thought you got rid of come back. And occasionally, one person's trash is another's treasure, which Cora and Sybella learn when they come across a diary detailing best-friendship problems.

## DALYA AND THE MAGIC INK BOTTLE

When twelve-year-old Dalya is dragged to Istanbul to help sell her family’s ancestral home, the visit begins unpromisingly. Most of the aged mansion is off-limits because it’s falling apart, her father is ignoring her, and her great aunt keeps prattling on about a family curse. Despite warnings against it, Dalya tiptoes upstairs, where she finds an old bottle of magic ink hidden under a floorboard. She asks the bottle’s jinn (aka genie) to grant her a simple wish...to send her home. Except the jinn interprets “go home” to mean “send me back in time and turn me into a cat.” Then Dalya must set off on a wild adventure through Istanbul’s animal underworld to find the jinn with the power to set things right. Along the way she collects a group of companions—furry and human alike—but if she isn’t careful, she’ll lose the chance to reverse her family’s fortunes and may never find her way back home.

## INFORMED!

Tweens and teens today are sceptical of the news, but they are more plugged in to current events than ever. They don't think traditional news sources understand their lives. Give them Information from a trusted source on topics that matter to them. Clear but sensitive, these titles tackle tough topics with nuance and understanding in a way that young people can relate to. With solid research and experts in the field to back it up, you can be sure it's not fake news. Long-form journalism at its best, for the curious but sceptical KS2 - KS3 reader.

Some kinds of falcons **migrate**. They fly to warmer areas during the winter. Then they return in the spring. These trips can be long. Some falcons fly 15,500 miles (25,000 kilometers) each year. That's like traveling across the U.S. more than five times!

Most falcons live high off the ground. They sit in trees or on cliffs. Some even live in busy cities. They make nests on skyscrapers or tall bridges.

**Amazing Tigers**

What kind of cats are orange with black stripes and can't purr? If you guessed tigers, you're right! They are the largest cats in the world. These striking animals are also great hunters.

Tigers are **mammals**. They have fur. They give birth to live young. Mothers feed milk to their babies. There are six kinds of tigers.

## MATERIAL CHOICES

A book is made with paper, but could it be made from metal? What about a window? Could it be made from stone instead of glass? Through answering these questions, the books in the Material Choices series will look at a variety of different materials. Each book explains what makes a common material suitable or not suitable for making the items in question, examines how the material is produced, and considers whether it is a sustainable resource. Levelled text with clear photo-text matches will make this STEM topic understandable for beginning readers.

## VOLCANO

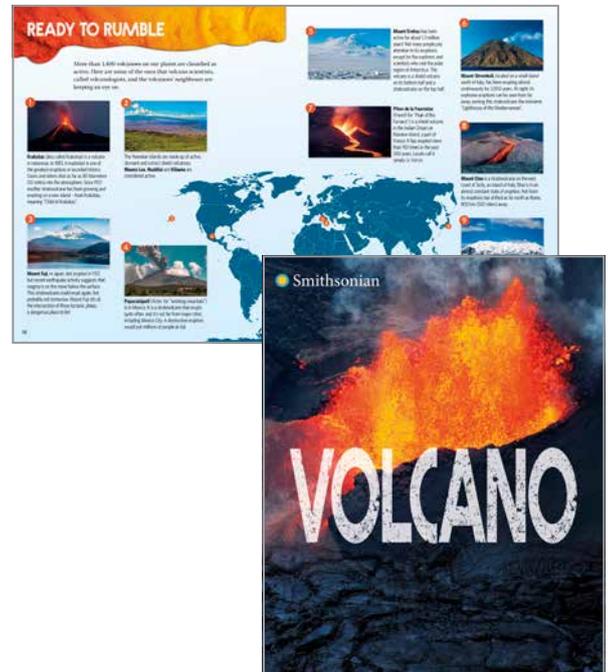

Lava shoots in the air, then bubbles down mountains, flattening, burning and boiling everything in its path. The destructive forces of volcanoes are terrifying and well-known. But what about their other forces? Volcanoes can spur new growth of plants and trees. In the water, they create an environment where coral reefs and sea life can thrive. In fact, the meeting of volcanic fire and ocean water gave way to life on Earth. Award-winning children's science author Mary M. Cerullo brings her excellent research and signature storytelling style to the dynamic subject of volcanoes. Stitching together science, history and mythology, Cerullo explores these explosive wonders of nature and reveals the secrets they've been keeping since the beginning of the world.
